Product information and specifications

MT Thunder 4 SV

The MT Thunder 4 SV represents a milestone for MT Helmets, since this helmet is the perfect brand ambassador thanks to its key features.

- The Thunder 4 SV was the first helmet with a sun visor, ECE 22.06 approved and exceeding the most rigorous quality standards to come to the market.
- It is a sport-touring model that incorporates the new MT-QVSS, a revolutionary quick visor swap system.
- In line with all the products of MT Helmets, the Thunder 4 SV is simply unbeatable in terms of safety-price ratio..

The MT Thunder 4 SV is one of those models that are set to become a milestone in its market segment, as it is packed with new features and systems that are making it a benchmark helmet.

The Thunder 4 SV was the first full face sun visor helmet to reach the market with a ECE 22.06 certification, a milestone in the market bringing comfort and safety together as no other sport-touring helmet has achieved to date.

For its price, the Thunder 4 SV represents magnificently the 'Value For Money' philosophy of MT Helmets, a company that develops all its helmets with the aim of offering the best value in the market.

It is a highly-advanced helmet because, beyond exceeding the most rigorous safety regulations, it has new features, such as the new MT-QVSS, a new visor swap system that allows you to detach/attach the visor even with the helmet or gloves on.

In short, the new Thunder 4 SV is the perfect helmet for all types of users. Since it was launched, this helmet has raised high expectations in all markets where MT Helmets has presence, proving that this model is a revolution "Born in Spain".
